```

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

IMPORTANT: This sequence is not the entire insert of clone MALJAPB. It may be shorter because we only sequence overlapping sections once, or longer because we arrange for a small overlap between neighbouring
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   submissions

4 NOTE: This is a 'working draft' sequence. It currently
5 consists of 57 contigs. The true order of the pieces
6 is not known and their order in this sequence record is
6 arbitrary. Gaps between the contigs are represented as
6 runs of N, but the exact sizes of the gaps are unknown
6 This record will be updated with the finished sequence
6 as soon as it is available and the accession number will Summary Statistics Center clone name: RPCI-23_127H3 Center: Joint Genome Institute Submitted (10-JAN 2001) Production Sequencing Facility, DOE Joint Genome Institute, 2800 Mitchell Drive, Walnut Creek, CA 94598, USA 1 (bases 1 to 231912) DOE Joint Genome Institute Eukaryota; Metazoa; Mammalia; Eutheria; Mus musculus clone RP23-127H3, Center Project Name: Project Information Web site: Center Code: JGI Direct Submission DOE Joint Genome Institute Sequencing of Mouse Mus musculus Mus musculus. arbitrary. Low-pass sequence sampling is useful for identifying clones that may be gene-rich and allows overlap relationships among clones to be deduced. However, it should not be assumed that this clone
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    will be sequenced
